EDWARD PENRHYN, Esq., East Sheen.

SAMUEL PALMER, Esq., Dulwich Common.

WILLIAM SHADBOLT, Esq., Croom's Hill, Greenwich.

CHARLES HAMPDEN TURNER, Esq., Rook's Nest, Godstone.

JOSEPH WILSON, Esq., Clapham Park.

JAMES FORBES YOUNG, Esq., Kennington Lane.

REPORT
OF THE
COMMITTEE OF VISITORS
OF THE
SURREY LUNATIC ASYLUM,
TO THE
COURT OF GENERAL QUARTER SESSIONS,
HELD AT REIGATE, APRIL 3, 1849.

THE Committee of Visitors, in presenting to the Court of Quarter Sessions their seventh Annual Report, beg to state, that the number of patients in the Asylum at the commencement of the year 1848 was 396; and during the year 63 additional patients have been admitted; making a total of 459. Of these, 13 males and 7 females have been discharged cured,—16 males and 17

females have died,—1 male and 1 female, ceasing to be parochial patients, have been removed to private Asylums,—1 male has been removed by the officers of a parish in another county to which he belonged,—and 2 males and 1 female have been placed uncured under the care of their friends; leaving in the Asylum, on the 31st day of December, 1848, 400 patients,—of whom, 188 are males, and 212 females.

The average number of patients attending Chapel has been 171; and an average of 233 have been constantly employed on the farm, or in the garden, or within the walls of the Establishment.

The Committee have been much occupied during the year in superintending and expediting the completion of the additional buildings. The wing appropriated to males was opened in November last, and placed with the other buildings occupied by male patients under the superintendence of Mr. HOLLAND, who had for two years been the resident Medical Officer of the Establishment.

The Committee, in accordance with the arrangements respecting the medical superin-

tendence of the Establishment, entered into with the Secretary of State before the new buildings were commenced, appointed, in September last, MR. CHARLES SNAPE to perform the duties of Resident Medical Officer for the Female Department. He entered upon his duties in November, and since that period the whole of the female patients have been under his medical care. In all matters relative to the medical treatment of the patients, both the Resident Medical Officers continue to receive counsel and instruction from SIR ALEXANDER MORISON, who has been the Visiting Physician of the Institution since its opening in 1841.

An Assistant Matron has also been appointed. The salaries of these, and all the other Officers and Servants of the Establishment, will be found in the appended tables.

The Committee have reason to believe that they will be able to open the new wing, for the admission of female patients, early in May next.

The Committee purpose to present to the Court, as soon as the new buildings are completed, a special Report respecting them, with

a detailed statement of the expenses which have been incurred in the erection of the same, and the preparation thereof for the reception of patients.

The Committee have pleasure in reporting that the use of mechanical restraint and seclusion on the male side has been, during the last year, very much less than ever previously reported; and they flatter themselves, by the continuance of a judicious mode of treatment, it may admit of further diminution.

The Medical Officers of the Establishment have found it necessary, during the year, to resort to a more than ordinary amount of restraint and seclusion amongst the female patients. The Committee have reason to believe that the increased excitement of the females (which has rendered the use of additional restraint and seclusion necessary) may be attributed to the noise and confusion of the workmen employed in the erection of those parts of the new buildings which approximate close upon the airing grounds and wards occupied by the female patients.

The Committee regard it as an essential

part of their duty to take care that no more restraint or seclusion is ever used than is absolutely necessary for the protection of the patients themselves: and they are happy to find that all the Officers of the Asylum are desirous of carrying out their views on this important subject.

In the Appendix are the usual elaborate tables, to which the Court is referred for all the details of the proceedings in the Asylum during the year 1848, respecting receipts and expenditure, treatment of patients, &c., &c.

REPORT
OF
SIR ALEXANDER MORISON,
VISITING PHYSICIAN
OF THE
SURREY LUNATIC ASYLUM,
January, 1849.

*To the Chairman and Visiting Justices of the
Surrey Lunatic Asylum.*

GENTLEMEN,

In conformity with your regulations
I have the honor to lay before you a statement
of the medical statistics of the Asylum for the
year 1848.

PATIENTS IN THE ASYLUM.	M.	F.	Total.
There were in the Asylum on 31st December, 1847	173	223	396
There have been admitted from that date to 31st December, 1848.	48	15	63
Total.....	221	238	459

Of this number there have been discharged—

	M.	F.	Total.
Recovered	13	7	20
Died	16	17	33
Removed uncured	4	2	6
	33	26	59
Remaining in the Asylum	188	212	400
Total	221	238	459

By the accompanying tables it will be seen, that of the 63 cases admitted during the period above mentioned, 7 males and 2 females have been discharged recovered; and 6 males have died.

Among the patients discharged cured during the past year, I have the satisfaction to record several cases of long standing—in particular 2 who had been insane for at least six years; and likewise 2 who had been so for more than four years.

The number of male patients who have died is less than that for the preceding year, while that of the females is greater; but taking both together, the number of deaths is rather less

than in any preceding year since the Asylum was opened. They have occurred, with few exceptions, in persons of advanced years, or else in those of whose recovery there was no probability when they were admitted.

The health of the patients in general has been good ; and notwithstanding the occurrence, to a fearful extent, of the dreaded epidemic, Asiatic Cholera, in the near neighbourhood of the Asylum, the inmates thereof have been happily exempted.

The same attention has been given to the medical treatment and the moral management of the patients as has been stated in former Reports. Under the latter being comprised religious exercises, intellectual and moral instruction in classes and otherwise, useful occupation, and innocent amusements. Personal restraint, whether by seclusion or by mechanical means, has been limited to the smallest extent considered compatible with the comfort and safety of the patients themselves and of those around them.

Occasional instruction has, as formerly, been communicated to pupils.

As the completion of the large additions made to the Asylum may be regarded as a new era in its progress, I have subjoined a statement of the number of patients admitted and discharged since the 14th June, 1841, when the Asylum was opened.

	M.	F.	Total.
Admitted from 14th June, 1841, to 31st December 1848	500	406	906

	M.	F.	Total.			
Discharged recovered ..	99	86	185			
Removed uncured	27	15	42			
Died	186	93	279			
Remaining 1st Jan. 1849	312	194	506	312	194	506
	188	212	400
				500	406	906

I have the honor to remain,

Gentlemen,

Your obliged and obedient Servant,

ALEXANDER MORISON.

January, 1849.

REPORT
OF
THE REV. R. F. CHAMBERS,
CHAPLAIN
OF THE
SURREY LUNATIC ASYLUM.

*Parsonage, Summers Town, Wandsworth,
January, 1849.*

GENTLEMEN,

It devolves on me as your Chaplain to furnish a Report respecting the year past.

As I have held the office only since Michaelmas, there is but little in my power to say respecting that period, further than to express my deep and growing interest in the afflicted inmates of the Asylum. It was with much hesitation that I requested the appointment of Chaplain when my respected predecessor resigned ; but now I can truly say, I have become more and more attached to the duties of the office every week. It is very gratifying to be enabled to alleviate, in any degree, such a heavy

calamity as mental derangement, and to soothe the agitated minds of the sufferers by the consolation they evidently receive from the ordinances of our blessed religion. This pleasing effect is manifest from the patients' calm and peaceful deportment, I may say, their devout attention during Divine Service; and no less so, from the smiles and affectionate welcome I receive from almost every one on their way to and from service, and on any occasion of meeting them. It would be presumptuous in me to hazard an opinion as yet, what measure of spiritual benefit the Lunatics possibly enjoy from the ministrations of religion; but I cannot have a doubt of the present and immediate advantage, when I witness their quiet attention during the hours of worship, and hear their numerous voices joining so cheerfully in Psalms and Hymns.

I must offer my tribute of admiration at the frank and cheerful spirit which seems to pervade the whole Institution, and which struck me the more forcibly, as I little expected to observe, among the male patients especially, such an apparent unconsciousness of any constraint. I had been far from anticipating the remarkable freedom and gentleness all the inmates of the

Surrey Lunatic Asylum seem to experience, contributing so much to their own happiness, and that of all connected with the Institution.

When I entered on my duties the Chapel was closed for repairs and enlargement, but on Christmas day I was permitted to re-open it, to the no small gratification and convenience of the congregation and myself—it is indeed a most suitable place for conducting with all decorum the Services of our Church as adapted to the use of the Establishment, and will prove, I have no doubt, commodious for the large addition about to be made to the number of the inmates.

I will embrace this opportunity of acknowledging the cordial co-operation I experience from every Officer of the Institution, in every ward; and I beg to express my gratitude for the kindness you have shewn me.

I have the honour to be,

Gentlemen,

Your obedient Servant,

RICHARD F. CHAMBERS.

To the Committee of Visitors of the
Surrey Lunatic Asylum.

S. BRIDGLAND.

Clerk and Steward.

[TABLE, No. 8.]
PRESENT DIETARY OF THE SURREY LUNATIC ASYLUM.

DAYS.	BREAKFAST.	DINNER.	SUPPER.
Monday	1 pint of milk porridge, with 6 oz. of bread for males, and 4 oz. for females.	Soup, thickened with barley, peas, and vegetables, and 6 oz. of bread.	1 pint of milk porridge, with 6 oz. of bread for males, and 4 oz. for females.
Tuesday	ditto.	Boiled beef, 6 oz. free from bone, with 4 oz. of bread, $\frac{3}{4}$ of a pint of beer, and vegetables.	ditto.
Wednesday	ditto.	Baked or boiled suet pudding, 16 oz. for males, and 12 oz. for females, with $\frac{3}{4}$ of a pint of beer.	ditto.
Thursday	ditto.	Meat pie, with vegetables, and $\frac{3}{4}$ of a pint of beer.	ditto.
Friday	ditto.	Baked rice pudding with treacle.	ditto.
Saturday	ditto.	Boiled mutton, &c., as on Tuesday.	ditto.
Sunday	ditto.	Boiled or roast mutton or beef, as on Tuesday.	ditto.

The male patients who work in the garden and farm, as well as those employed as bricklayers, carpenters, painters, plumbers and glaziers, and in the engine-house, are allowed for luncheon bread and cheese, with three quarters of a pint of beer for each; and the females employed in the kitchen and laundry, bread and cheese, with half a pint of beer each; and the whole of the female patients in employment, whether in the kitchen, laundry, or wards, receive weekly two ounces of tea, eight ounces of sugar, and six ounces of butter. The sick, throughout the Establishment, are dieted at the discretion of the medical officers.

STEPHEN BRIDGLAND, *Clerk and Steward.*

STATE OF THE ASYLUM

*From its being opened for the admission of Patients,**14th of June, 1841, to 31st December, 1848.*

ADMITTED.			Total.
Males	500		
Females	406		
			906

DISCHARGED RECOVERED.			
Males	99		
Females	86		
		185	

REMOVED UNCURED.			
Males	27		
Females	15		
		42	

DIED.			
Males	186		
Females	93		
		279	
Total.....		506	

REMAINING IN THE ASYLUM 31st Dec. 1848..		400	
			906

OF THE 500 MALE PATIENTS ADMITTED SINCE THE ASYLUM
WAS OPENED.

Under 10 years of age	4
From 10 to 20	21
20 to 30	101
30 to 40	162
40 to 50	108
50 to 60	63
60 to 70	29
70 to 80	7
Age not ascertained	5
	<hr/>
	500

Of the 406 female patients admitted—

From 10 to 20	19
20 to 30	89
30 to 40	89
40 to 50	95
50 to 60	62
60 to 70	36
70 to 80	14
Age not ascertained	2
	<hr/>
	406

Of 186 males who have died—

From 10 to 20	2
20 to 30	21
30 to 40	63
40 to 50	50
50 to 60	28
60 to 70	13
70 to 80	8
Age not ascertained	1
	<hr/>
	186

Of 93 females who have died—

From 10 to 20	3
20 to 30	11
30 to 40	18
40 to 50	18
50 to 60	15
60 to 70	12
70 to 80 and upwards	15
Age not ascertained	1
	<hr/>
	93

The following observations will explain the medical terms used in *Tables Nos. 12 & 13*.

The phenomena of insanity may be comprehended under three heads, those of Unreasonable Conduct, Incoherent Discourse, and Erroneous Ideas or Delusions. These have been again divided into two classes, one including the symptoms of a deranged, the other those of a weak mind, constituting the Lunacy and Idiocy of legal writers.

Derangement of mind may be either general, affecting the different manifestations of mind, including attention, memory, imagination, judgment, and the affections and propensities; or it may be partial, affecting only some of them. The term Mania is applied to general insanity, and that of Monomania to partial insanity.

Weakness of mind may, in like manner, be general, or it may be partial; it may also be congenital, that is from infancy. It is, when general, termed Idiocy, and the term Imbecility has been applied to slighter degrees of weakness of mind when congenital.

Weakness of mind, however, is not always from birth; it frequently occurs after the full possession of the mental faculties, and then the term Dementia or Fatuity is employed to distinguish this state, which is analagous to Idiocy; and the term Incipient Dementia is used to mark the lesser degrees of weak mind analagous to imbecility, and modified by the previous circumstances of the patient. This last-mentioned state in its various stages is very common in Asylums, where we often find the original character of the mental disorder more or less blended with weakness of memory, and incoherence of ideas. It also usually accompanies palsy and epilepsy, and is frequently the state of mind in old age.

In most cases of Mania the ideas are erroneous. Occasionally the unreasonable conduct of the insane person is not attended with this feature, but appears to be the effect of strong propensities overcoming the power of reason and of will. The term Mania, without Delirium, has been applied to this variety, which is not of very frequent occurrence.

ALEXANDER MORISON, M.D.
